HENDON SA 5011

To whom it may concern,

The National Electrical and Communications Association has reviewed the updated Quality, Health, Safety and Environment (QHSE) Code developed by TQCSI.

TQCSI's QHSE Code is intended to be used for companies that are required to be prequalified in DPTI Categories 3 and 4. It provides guidance to members and will be a useful self-assessment tool for those members who are implementing a management system to address quality, work health and safety and environment issues.

The Code is based on ISO 9001 (quality management), AS 4801(safety management) and ISO 14001 (environmental management).

The Code is also intended to be used to assist businesses pre-qualify with other local regulators and major clients.

The National Electrical and Communications Association endorses the updated QHSE Code when implementing management systems for our members.

Yours sincerely

RORY SWEENEY
MANAGER WORK HEALTH SAFETY, ENVIRONMENTAL & QUALITY
